Subject: Bisbee AZ?

---

Headed out to Arizona for the holiday and my brother wants us to fly down to Bisbee (P04) on a sightseeing trip. The airport looks fine (6K runway) but it looks like the airport is just north of the Mexico border with southbound departures needing to make an immediate turn on takeoff and northbound landings needing to fly a tight pattern. Anyone ever flown a Mits (or anything else for that matter) into Bisbee and have some first hand recommendation?

Thanks,

Dave
