After nearly 10 years of great service we are moving out of our Mu2.  
One partner has a daughters wedding and 2 kids in college, another has 2 going into college.  
We just aren't using it like we did at that time in the past.

It is on Controller, N316EN

An SA Type Certificate M-model with the -10 prop blades (-6 engines still) that have about 500  
hours until Hot Section and Gearbox.

All new glass windshields, cabin windows and new wing boots.

Get in touch if interested. Its based in Phoenix now.

Tom
