Subject: Jack pins - main and nose, for MU2

Hi all,

not sure if that is the right English term, but I am looking for jack pins to lift MU-2. Attached pictures that might help to explain it: I have universal jack lift but need pins ("adapters"?) to attach to wings and nose so that I can lift the aircraft (e.g. to replace tire etc.).

Anybody can recommend where to get those (and how to actually call them properly in English?)

Thanks

Karel
