---

I'm new to the forum and am looking for anyone considering the sale of their long body with -10s...preferably with the forward facing seats behind pilot/co-pilot rather than a bench. Marquise would be great, but N models with -10's seem great for mission needs as well.

I've missed a good one off-market, but that's helped define the market (along with those already publicly listed).

Any leads/info would be appreciated!
