Now that's a trip I would like to take 3 months or so to do.....so as to enjoy the journey, stopovers, etc. I've done trans-atlantic. It might be easier to find out the routes taken by any/all GA aircraft and take it from there, especially a plane with our range. (BTW, the POM describes a range of 1500nm for the Solitaire---with a 20 kt tailwind but I doubt that anyone has actually reproduced those figures
