Here's a question for you experienced Canada hands - what do I need for travel to Canada in my plane? I know about CANPASS, passports, customs sticker, etc. according to the AOPA website I also need a radio license, but when I follow the links, the FCC site is confusing. Do I need a radio station license (made out for the plane)? A radiotelephone operators license for me? Both? Can anyone walk me through exactly why I need to get to be legal?

thanks and Happy New Year?

Dave
