I have removed the following from my plane, all with serviceable yellow tags from a 145 repair station:

Collins Vertical Gyro Type 322D-11A P/N 622-4565-001. Was the reference gyro for stabilization of my RDR 2000 radar. Comes with the shock mount feet.
General Design 2 1/4" Turn and Bank, 28V Model No. 2800-4810N3, connector included!
Icarus Altitude serializer P/N 3230015-3 Model 30004
NAT RS24-020 relay box.

Also removed 35lbs of wiring, but doubt anyone wants that!

Make me a fair offer. Who knows, you might need a spare someday!

Thanks,

Jeff Axel

I left all this stuff with Chuck Walton after my 100hr in case anyone needs any of it.
