Hi all,

when I purchased my MU-2B Marquise, I only got one key. Is there a way to purchase another spare key? Where and how can I do that, any recommendations?

I am based in Europe but this is not urgent, can pick it up next time I am in the US or have it sent, if that's possible.

Thanks in advance for any recommendations

Karel

I'm in need of a second key as well. I hit 4 locksmiths in Denver yesterday and nobody has the blank. One guy said he can order them, but he has to buy them in quantities of 10. Any other sources that anybody knows about?

I had keys made a couple weeks ago. My local locksmith had the blanks. Tell them they are 1970s Mits. car keys. It was like \$6 per key.
